The massive amount of data generated by industrial businesses has enormous potential for optimizing assets, yet 99% of data is currently discarded.

Optimizing Data Use

From 2010–2015, real wages in Central and Western Asia grew from 3.4% to 5.7% annually.

As wages rise, such industries as manufacturing benefit financially far less from traditional sources of low-cost human labor.

Increased Labor Costs

Industrial corporates are slated to invest 5% of their annual revenue in digitization - a yearly sector-wide expenditure of $907B over the next five years.
